

Fleet Telemetry

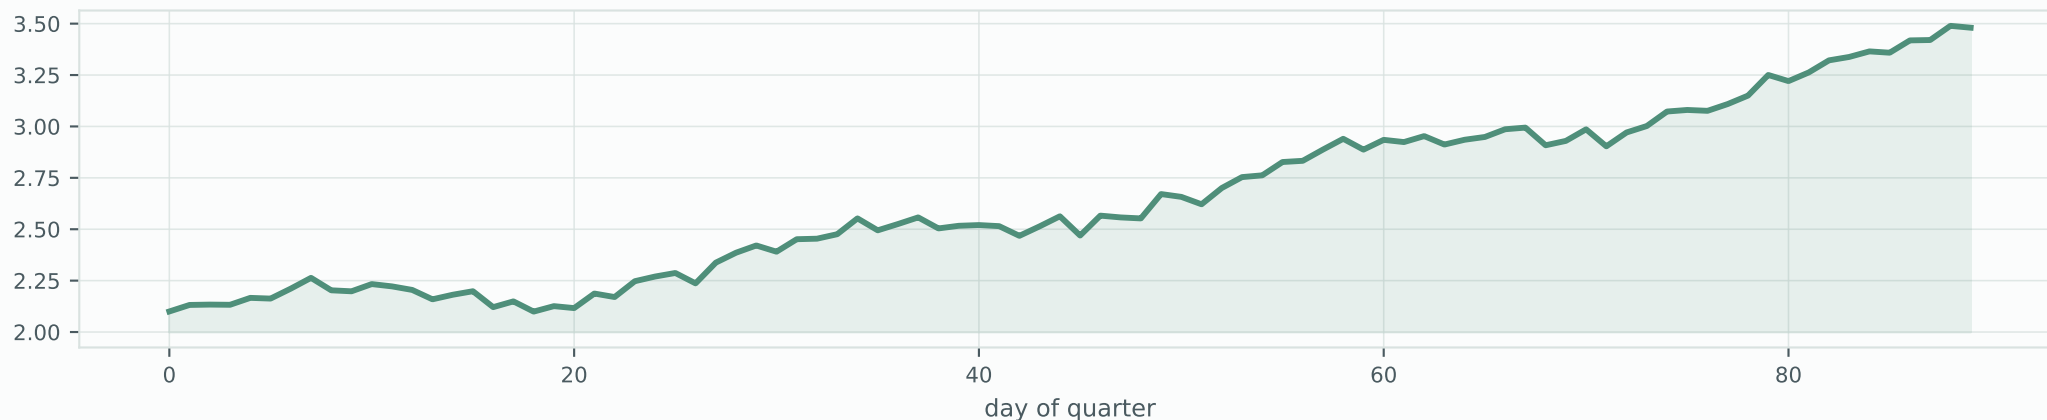

Quarterly Engineering Report — Q2 2026

Rollout of the adaptive ingestion pipeline cut p99 query latency by 38% while daily events grew from 2.1B to 3.4B.

This report covers throughput, latency, error budgets and

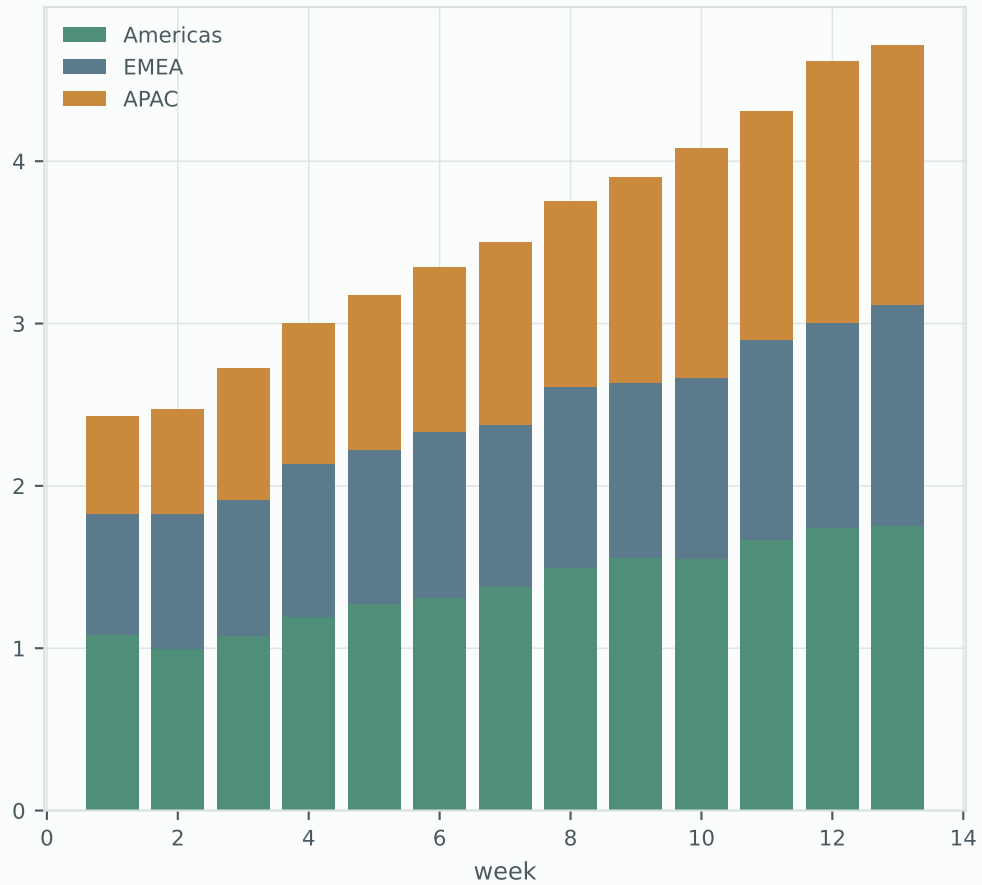

the capacity outlook for Q3.

daily events (B)

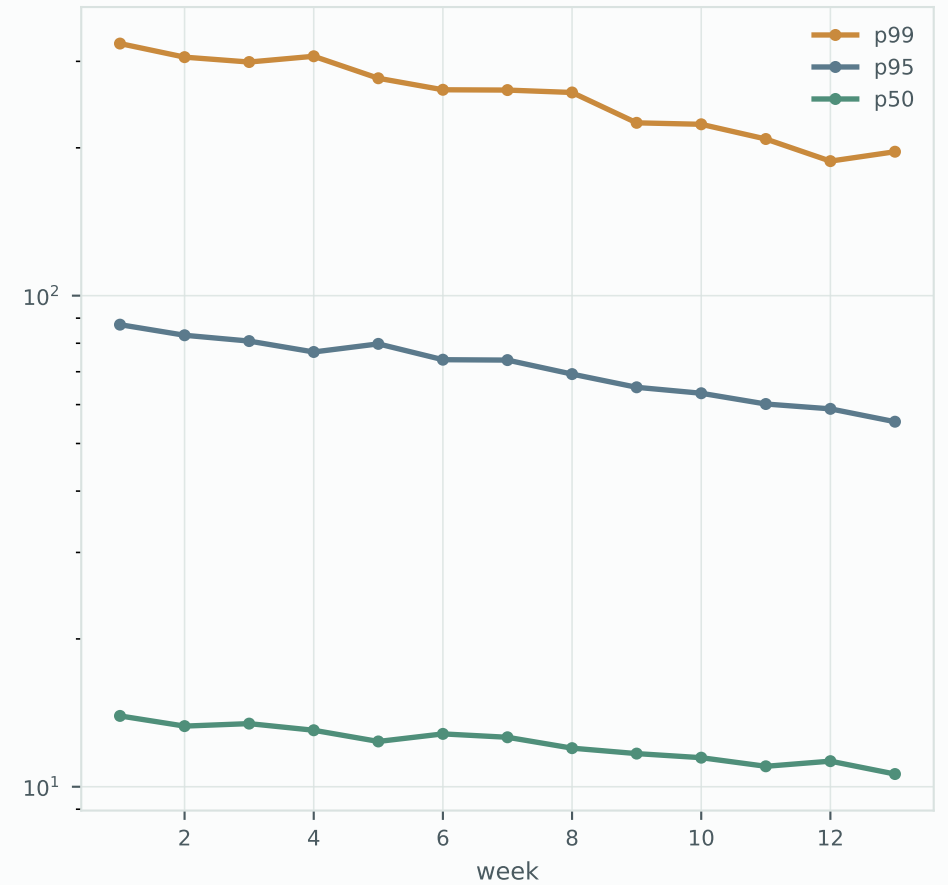

Ingestion & Latency

Weekly ingest by region (B events)

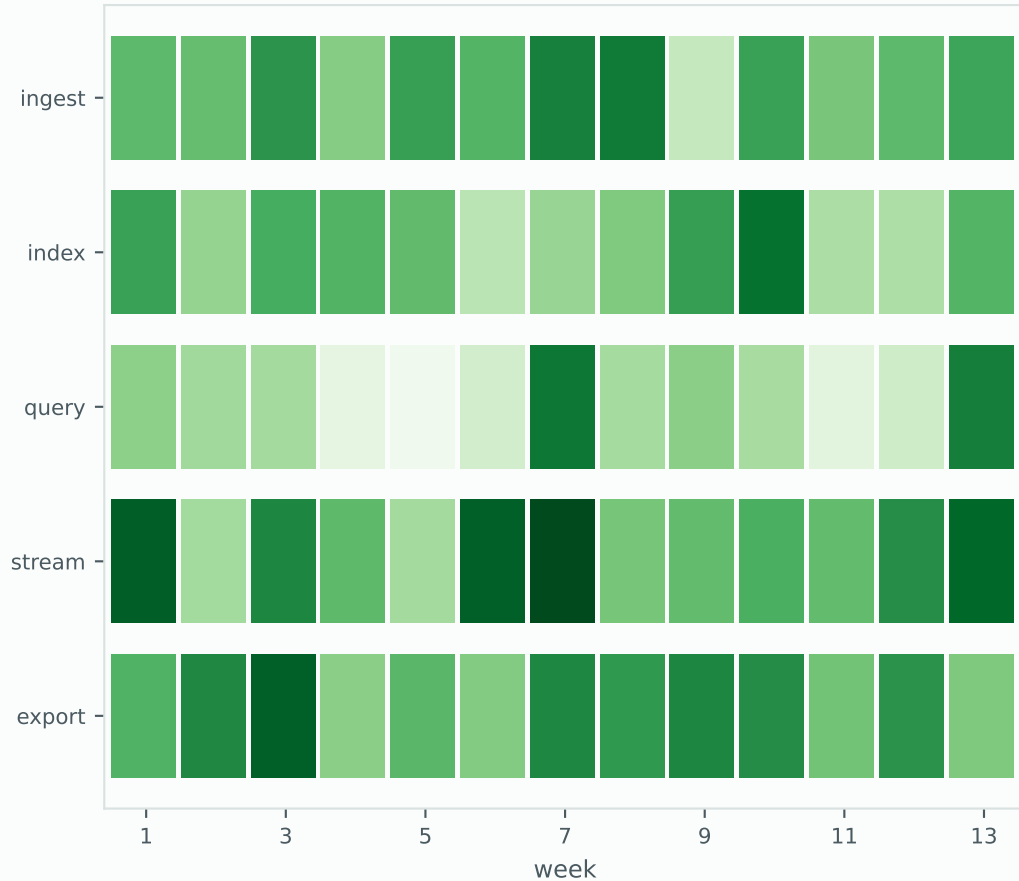

Query latency (ms)

Error Budget & Capacity Outlook

Error-budget burn (dark = healthy, light = burning)

Capacity vs. demand (B events/day)
